Breakout-Session

Participants of the workshop in Omuthiya and Hogsback discuss and collect central topics of discussion at the workshops:

- What aspects treated in the respective Workshop have been important to you?
- What do you consider to be central for your own research and the project as a whole going forward based on the respective Workshop?
- Did collaborations or projects emerge from the Workshops you want to talk about?

Listening session

Listening and discussing research-relevant audio materials together. This should offer an opportunity for everyone to get other takes, views, positions etc. on audio that is relevant in the individual research projects. These contributions are not meant as lectures! Rather give us a short contextualization of the material before we listen to it and discuss it together.

***Please send the audio-files to Emanuel Welinder
